50 Years with Ajax  
COVID-19RK Sanitizing Spray Gun Kit

# COVID-19 UPDATE

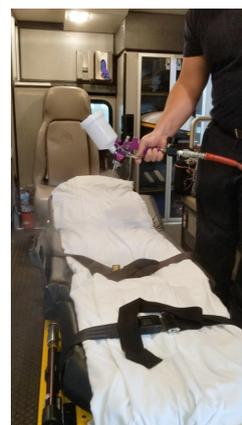

We at Ajax know that this has been a very difficult time for everyone; we are open and ready to support all your needs. We have taken several steps to ensure the safety of our workers including following CDC COVID-19 protocols like wiping down work surfaces several times a day, taking the temperature of all people entering our building, wearing masks and social distancing. Because of this, our staff is very proud to have been making and shipping our American Made products today and every day moving forward. Thank you to all our first responders for your dedication in the fight against the Covid-19 pandemic.

## Ajax Model No. COVID-19RK Sanitizing Spray Gun Kit

**The Covid-19 Coronavirus pandemic has created a situation that requires first responders to adapt new tactics to combat the spread of the Covid-19 virus and protect themselves as well.**

In response to this, we developed the COVID-19RK Sanitizing Spray Kit. This kit utilizes the SCBA air cylinders fire departments have in their inventory and creates a portable “On The Go” spray gun sanitizing system for disinfecting ambulances, engines, rescue equipment, common areas, and living quarters around firehouses.

*Ajax COVID-19RK Sanitizing Spray Gun Kit used at the local Covid-19 Testing Center in Markham, Illinois with the National Guard.*

### Kit Contents:

- 1 Ajax 8250H High Pressure Regulator
- 1 Ajax 998 ¼ " Hose with Couplers
- 1 Ajax 1959 gravity Feed Spray Gun

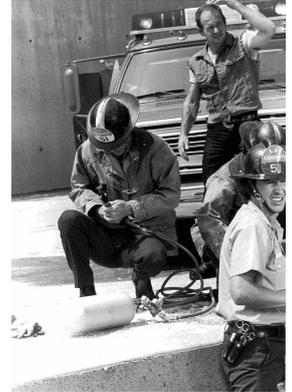

# Celebrating 50 Years

*Same powerful tools 50 years later*

As we continue to reflect on our 50th Anniversary in this memorable year of 2020, we celebrate the partnerships with several Fire Departments that designed and produced some of the first rescue tools for use in vehicle extrication, forcible entry and confined space rescue. Over 50 years ago, Ajax Rescue Tools pioneered the application of air chisels in vehicle extrication.

Our tools were used in several different episodes of the 1970's television series "Emergency"- a medical drama and action adventure show that starred two rescuers that faced different rescue scenarios every week. "Emergency" was a great platform in exposing the country to the new and expanding career opportunities in the Fire Rescue field. When it first aired, there were only 12 Paramedic units in all of North America, which grew to many Ambulance or Paramedic Rescue units within 10 minutes of most of the American population.

**We continue to evolve with many technical changes that occur and now offer rescue kits and accessories that can be used at any level in the vehicle rescue and extrication process. Our expanded offering includes a full line of Urban Search & Rescue Tools for structural collapse and confined space rescue and extrication.**

The lightweight and compact design of these tools offer the rescue technician the ability to easily transport and maneuver these tools while in a confined space. It has always been our goal to develop products that will offer the rescue technician the best opportunity to have a successful rescue and extrication in any given situation, which is why we've been recognized as "The Extra Hand in Extrication" for decades.

## These kits include:

**Confined Space Breaching Hammer Kit**  
311-RK Kit

**Confined Space Breaching Drill Kit**  
411-RK Kit

**Heavy Duty Breaching Drill Kit**  
511-RK Kit

**Heavy Duty Breaching Hammer Kit**  
611-RK Kit

# Strip & Peek Trim and Molding Removal Tool

Ajax Rescue Tools Model No. 674-RT

## FEATURED PRODUCT

The Ajax 674-RT trim & molding removal tool is designed to expose potentially hidden hazards, such as undeployed air bags, side / roof curtains, cylinders / canisters and seatbelt pretensioners. By removing or peeling back plastic trim and molding this also allows you to expose steel structures so you can decide where to make your cuts if needed.

## V.M.O. (VEHICLE MACHINERY OPERATIONS) CLASSES RESUMED

Training is the backbone for fire departments, it produces a well prepared force that through repetition increases the speed of an operation and enhances proper execution while reducing injuries.

N.I.P.S.T.A. (Northern Illinois Public Safety Training Academy)  
Glenview, IL

Romeoville Fire Academy  
Romeoville, IL

We appreciate the opportunity to work and train with first responders to help make their communities a safer place!

## EMPLOYEE HIGHLIGHT

**Larry Serritelli**

Larry Serritelli has been with the Ajax Rescue Tools team for over 6 years, but has worked with Ajax on a distribution level for more than 30 years. Larry started out his career at Ingersoll Rand where he was trained in the detailed operations of air tools and the proper usage of air tools. He then spent 36 years working in various positions in Industrial and construction sales as well as working with end users to solve any issues that they had regarding air tools and accessories.

Larry has worked at several training events for Auto Extrication and Structural Collapse, and has demonstrated and assisted in the use of these tools. He was also instrumental in developing and shooting the Ajax Rescue Tools video series on Structural Collapse and Confined Space Rescue Tools. All of these videos can be viewed on our website: [www.ajaxrescuetools.com](http://www.ajaxrescuetools.com).

*If you happen to see Larry at a training event or rescue competition, please feel free to say hi and ask about our new products.*
